LETTER OF RECOMMENDATION – RICHARD OSEI JUANTUAH

I am submitting this recommendation in support of Mr. Richard Osei Juantuah who is seeking admission into your institution to pursue a Master's degree.

I have known Mr. Juantuah since September 2013 as an undergraduate student (2012-2016). I have therefore had the pleasure of following his academic development over a three-year period as well as his professional endeavour, and I can state with confidence that he is a motivated and responsible person with a high degree of integrity. Richard successfully completed his undergraduate programme at the University of Ghana, Legon. He was awarded a Bachelor's degree in **Economics with Information Studies (Second Class Honours – Upper Division)**, obtaining a **Final Grade Point Average (FGPA) of 3.19 out of 4.00**, based on the University of Ghana grading system..

During his undergraduate days at the Department of Economics, Juantuah demonstrated a par excellence performance in both coursework and research works, even as he actively engaged in extracurricular activities in volunteerism, student leadership, student body engagements as well as a part time outside-campus job induced by his acute financial need. He is an enterprising lad who has actively and consistently contributed in class with valuable out-of-the-box insights and thought-provoking intuitions. His heterodoxal approach to the subject of Economics by way of analysis and interpretation and his diligence in delivery is worthy of commendation. Mr. Juantuah has demonstrated beyond measure, the requisite skill-set and competencies desirous of a budding young Analyst. Nonetheless, his readiness and willingness to learn something new to further deepen his scope of knowledge and understanding of Business, Analytics and Research is remarkable. His outstanding scholastic aptitude and analytical skills led to the award of the Certificate of the Vaswani

Endowment Fund Award for Economics (2015). As I got to know Richard better, I became overly impressed by the wide range of his abilities and his modesty.

Richard's commitment and hard-work in pursuing his goals will serve him well in graduate school. He is a self-motivated individual with a solidified resolve to do better than the status quo. Further, Richard is a good communicator, an independent-minded person, well-trained, ambitious, and yet very open-minded with an encouraging attitude. I am certain that considering his requisite training and outstanding knowledge in Economics, he will exceed the standard when given the opportunity to further his education at the graduate level. Without any reservation, I highly recommend him for admission into your programme.

Frank Agyire-Tetteh, PhD
Senior Lecturer, Department of Economics
